HDJ-2000

Professional DJ Headphones

The top of the range radically styled HDJ-2000's set new standards for sound quality, comfort and durability in the most demanding environments.

Developed and tested with leading DJs, the HDJ-2000s are sound matched for optimum fidelity with the DJM mixer range and are developed without compromise, allowing you to focus on your performance in comfort and style.

Pioneer

The new i-hinge design allows the ear cups to swing a full 90° with auto-return giving flexibility on your chosen monitoring style.

Lightweight magnesium design.

Heavy duty construction for zero resonance.

A protein leather surface gives a no-fatigue fit whilst insulation from external noise is achieved through carefully chosen materials.

Long sessions in the club or studio are made comfortable by the heat resistant memory-foam padding.

When not in use the HDJ-2000s fold into themselves making them ideal to transport.

Optimised driver units contain a large high-flux magnet & voice coil for high sound quality and clear separation of frequencies for easy DJ monitoring.

Removable Mini XLR connector.
